BUDDHIKA ROSHAN BANDARA

INFORMATION TECHNOLOGY UNDERGRADUATE

✆ +94 77 924 6922 | ✉ buddhikaroshanofficial@gmail.com | ■ No.231 Kaduwela Road, Malabe | GitHub | LinkedIn | Portfolio

SUMMARY

A third-year IT undergraduate with expertise in programming, data analysis, machine learning, UI/UX design, mobile app development, and full-stack development. Passionate about leveraging technology to create impactful solutions for real-world challenges. Actively seeking internship opportunities to apply technical skills, enhance practical knowledge, and grow as a technology professional.

WORK EXPERIENCE

LANKATILES (Lanka Wall tiles PLC | Lanka Tiles PLC), Polonnaruwa — Customer Care Assistant **2020 - 2022**

- Provided exceptional customer service, improving customer satisfaction and retention.
- Collaborated with teams to optimize service workflows, enhancing overall operational efficiency.
- Transformed customer interactions by providing personalized solutions, fostering long-term client relationships, and enhancing brand loyalty.

EDUCATION

BSc (Hons) in Information Technology Specializing in Information Technology **Oct 2022- Present**

- Sri Lanka Institute of Information Technology (SLIIT), Malabe

G. C. E. (A/L) Examination in Biological Science Stream **2016-2019**

- Royal Central College, Polonnaruwa, Sri Lanka

QUALIFICATIONS

IBM Data Analyst Professional, IBM - Certification **Active**

- Developing expertise in data cleaning, analysis, and visualization using Python, SQL, and Tableau, with a focus on data storytelling and actionable insights.
-

Machine Learning Specialization, Stanford University & DeepLearning.AI - Certification **Active**

- This program covers key machine learning concepts and practical skills for AI beginners.

Data Science Math Skills, Duke University - Certification **2024**

- A course covering essential math concepts like linear algebra, calculus, and probability tailored for data science.

AI/ML Engineer - Stage 1/ Stage 2 **2024**

- Completed foundational AI and machine learning training, covering supervised/unsupervised learning, neural networks, and practical model applications.

Google Data Analytics Professional, Google — Certification **2024**

- Developed skills in data cleaning, visualization, SQL, R programming, and analytical tools, with hands-on experience from real-world projects and case studies.

Google UX Design Course, Google — Certification **2024**

- Completed Google UX Design Course with 7 sub-courses, covering wireframing, prototyping, UX research, responsive web design, and Adobe XD/Figma software.

PROJECTS

Air Line Ticket Reservation System — 2023

Technologies: HTML, CSS, PHP, MySQL

- Developed a user-friendly flight booking web application with features like flight search, seat selection, and secure booking, using PHP for server-side logic and dynamic content.

Online event planning system — 2023

Technologies: Java MVC Architecture

- Developed a web application for seamless event management, including package management, reservation handling, and account management. Streamlined the event organization process by implementing modular MVC architecture to enhance maintainability and scalability.

Private institute Management — 2024

Technologies: MERN Stack (MongoDB, Express, React, Node.js)

- Developed a full-stack web application for student management, course registration, and performance tracking. Key features include user authentication, real-time updates, and an intuitive interface, enhancing technical and project management skills.

Portfolio — 2024

Technologies:HTML,CSS,JavaScript

- A collection of user-centric design projects showcasing wireframes, prototypes, and case studies. Highlights include UX research, usability testing, and innovative designs crafted to enhance user experiences.

Chat Bot — 2024

Technologies:Python

- DocBot is a simple chatbot designed to answer Python programming queries using basic natural language processing (NLP) techniques. This project serves as an introduction to chatbot development and demonstrates fundamental NLP concepts like tokenization, cosine similarity, and response generation.
